November 13, 2014

Mr. Frank S. Borris II
Director, Office of Defects Investigation
National Highway Traffic Safety Administration
1200 New Jersey Avenue SE
Washington, DC 20590

Dear Mr. Borris:

Attached please find our most recent list of 196 consumer complaints filed with the Center for Auto Safety (CAS) on Chrysler Totally Integrated Power Module (TIPM) issues. Full complaints may be viewed by clicking on the “View” link in the far left column of the electronic version of this letter. Consumers continue to file complaints with CAS that confirm a range of safety-related defects involving the TIPM. The most often cited TIPM failure is a loss of vehicle power that can create a dangerous stall condition at any speed. Additionally, there are numerous complaints alleging bizarre and unexplained headlight and taillight failure, windshield wiper activity, instrument panel failure, and door lock problems.

Airbag Complaints

Your letter of September 29, 2014 asked about airbag complaints including non-deployment. As NHTSA knows from the GM ignition switch mass defect, it is virtually impossible to be sure that an airbag will deploy until there is a crash. However, NHTSA itself has viewed airbag warning or readiness light failure as a safety concern to be investigated. See [PE05-043](#) where NHTSA initiated a defect investigation where “Repeated and uncorrected illumination of the SRS or readiness indicator light can hinder the detection of potential vital airbag system operation of components such as airbag module, crash sensor and wiring integrity.”

Complaints directly citing airbag system warnings can be found in the following complaints received by CAS:

35. “Defective TIPM: causes multiple electrical issues including failure to start, malfunctioning fuel pump, inoperative air bags and random horn”

36. “TIPM is bad. Car doesn't start and now the fuel pump keeps running. The TIPM can cause the airbags to not deploy and car to stall at anytime.”

61. “Started with the airbag light. Then a battery. Now the TIPm module. This has been a safety issue for a while.”

62. “From time of purchase constant oil burning smell, after 4 dealership trips problem determined to be faulty oil breather leaking onto O2 sensor. Early 2014 Master cylinder frozen causing severely hard brake pedal. July 2014 vehicle computer failure requiring replacement and subsequently exhausting the vehicles battery requiring repair. October 2014 faulty wiring in passenger front seat causing airbag failure warning to illuminate and the TIPM sensor failed making the vehicle unable to start. Overall this vehicle continually displays the makings of a complete LEMON as per the text book definition!”

82. “At mile 142, on day 3 of ownership, the airbag light began turning on intermittently. I brought it in for service, the next day. The dealership reset the computer and sent me on my way. That night, the same problem recurred. I contacted the dealership, who set up a new appointment for me on day 8 of ownership. They kept the car and gave me a loaner. They called that night, to let me know that the TIPM was faulty, and that the part was on backorder. They have since put me in a rental car. I have now learned that there is a class action lawsuit against Chrysler for this very part. I don't know how long I'll be in a rental, or when the part will be in. I am extremely concerned for my family's safety, once I get my new car back. I am unconvinced that, once the new part arrives, I will not have problems with it.

105. “The TPIM is going out. Lose power to all sorts of things. Happens at will, mostly below 32 degrees or freezing 4x4 can't be turned on, no power to rear windows, airbag lights come on, ABS comes on, ESP comes on and off, Tow/haul comes and goes, sliding rear window comes and goes, heater fan DON'T work at all SERIOUSLY DANGEROUS being the problem occurs at freezing temp. wind shield wipers come and go, digital thermometer stopped working also fuel economy is terrible now too 12-13.5 MPG average

146. “Failed TIPM. Open circuit in drivers seat airbag.”

NHTSA also inquired about complaints submitted to the agency on airbag system failures. The agency's complaint database contains over 10,000 complaints on the subject vehicles as of November 5, 2014. A cursory search of NHTSA's complain database turns up the following VOQ's related to airbag system problems in the subject vehicles: 10628311, 10559190, 10546506, 10542104, 10621901, 10368810, 10619130, 10619133, 10514933, 10562678, 10547415, 10604486, 10406375, 10410579, 10429082, and 10406375. There are quite a few more consumer complaints that cite instrument panel lights without specifically referring to airbag warning lights. NHTSA's ability to evaluate these complaints far outstrips ours, as the public VOQ database contains limited information, and NHTSA has the ability to contact complainants whose personal information is redacted from the public file.

In addition, the Center has provided the agency with a list of EWR death and injury claims on relevant defect codes on vehicles covered by the defect petition. With the addition of the EWR data through June 30, 2014, there are [329 claims reported on vehicles with the TIPM](#). Only NHTSA can obtain the underlying records. The Center urges NHTSA to do so.

Acceleration Complaints

Your letter of September 29, 2014 also asked about unintended acceleration. The Center used this term to indicate reports where the vehicle continued to move or accelerate when the operator did not want this to happen. Below is an analysis and listing of CAS complaints as requested.

TIPM issues related to acceleration appear to arise from lack of fuel pump shut-off as well as problems with gear shift, throttle, and cruise control. There are quite a few consumer complaints in both CAS and NHTSA databases citing lack of fuel pump shutoff that result in stalling and/or non-start condition but do not produce uncontrolled acceleration. In the interest of space we have not included these below. Consumer problems related to acceleration, gear and/or throttle control may be found in the following CAS complaints:

69. “On January 27, 2014, after remotely opening the sliding door but before starting the car (I was still in the house), the minivan's horn began a constant blaring, and the front and back windshield wipers came on. After a few minutes when it became apparent it would not stop on its own this time, I disconnected the battery terminals, but nothing changed. After 30 minutes, I drove

the van to the local Chrysler service center. During the 15 minute drive, the car would not downshift at all. When I arrived at the service center, the mechanic disconnected the fuse (or possibly the TIPM) to stop the car's horn and wipers. After a mechanic inspected the minivan, the service manager informed me that the TIPM was bad and would have to be replaced. I paid the entire cost of \$818.00 (\$610.00 for the TIPM and \$208.00 for labor)."

89. "I was driving my 2009 Dodge Journey today, 9/10/11 and all of a sudden it started to lose power. It began to shake as if it were trembling underneath the vehicle. The Journey was in drive and started to go backwards. I pressed the accelerator with my foot and it went straight to the floor. The gear shift was in drive and the car continued to go backwards with the gear shift in drive. I was very frantic and then began to press the brake pedal with my foot. The Journey would not stop. The brake pedal went straight to the floor as the car continued to go backwards. I quickly pressed the emergency brake with my left foot and the car stopped suddenly and shut off while the gear was still in drive. I put the gear back in the park position and tried to start the car but it would not crank. I waited a few minutes and then tried to crank the car again. The car started and I drove it slowly back to my home. I was only a few feet from my home. The car is parked and I am frantic to drive it. I am very fearful after what happened today. My children were in the car with me and were very afraid that we were going to get hurt. There is something wrong with my 2009 Dodge Journey. I can't drive it to work. In fact, I can't drive it at all. I refuse to get back in it!"

106. "Ram 2500: My truck has only 47K miles on it and is perfect condition. It is a 2009 Dodge Ram 2500 Diesel with a 6 speed manual transmission. Last Thursday evening, while driving home from work, the vehicle began spraying wiper fluid by itself and then wiper blades came on with no input from myself. After driving less than a block all power was lost and the vehicle stalled. After attempting to restart the vehicle and realizing there was no power at all. I put the emergency brake on, put keys in my pocket and truck in first gear. I then popped the hood on the vehicle only to notice smoke coming from the TIPM module. I opened the cover to this exposing the fuse panel. Instantly I could see there had been a major electrical short. I called a tow truck and no more than 10 minutes had passed the TIPM module began to catch fire. At that point the vehicle tried to start itself and began to lurch down the road without a driver. Again, this is a manual transmission truck and will not start without depressing the clutch in BUT somehow as the vehicle shorted out it was able to override this? Luckily, I was able to stop the truck safely. A passerby stopped with a fire extinguisher to help me stop the fire. The vehicles horn was stuck on as the vehicle began to electrically melt down. I then pulled both battery cables to stop all this non-sense. I had the vehicle towed to the dealership and they confirmed the TIPM module caught fire and will need to be replaced along with engine wiring harness."

117. "The car has been into the dealership 5 times because the engine races out of control 18 plus times for no reason. I have to pull over and shut the car off to stop the engine from racing out of control. The dealership doesn't want to do anything about it and I can not get anyone from Jeep to return or respond to my letters."

183. "I purchased a 2014 Jeep Grand Cherokee Limited for \$46,000 from Dothan Chrysler Dodge Jeep Ram on Saturday, August 17th, 2013. We drove off the at 8:30 p.m. that evening. On Monday, August 19th, at approximately 4:00 p.m. as I was driving down the highway after having just left my job at the Washington County Sheriff' Office, where I am the public information officer, my vehicle's screen flashed a warning that read: vehicle gear shift malfunction. The screen went completely black for approximately 1 minute. When it came back on the screen read: Please Service Transmission followed by turn off ignition to engage park. I tried to turn off ignition, in the middle of the highway, and the warning then read: vehicle must be in park to turn off ignition. This endless circle continued as I was able to stop the car at a gas station parking lot. I sat in the parking lot of the gas station for approximately 5-7 minutes where I documented (via cellphone camera) the repeated messages and attempted to turn my engine off and simultaneously attempted to put the vehicle in park. The gears would not display. There was no way to see if the

vehicle was in park, or what gear it was in at all. After struggling with the vehicle for close to 7 minutes, I was FINALLY able to turn the ignition off. When I restarted the vehicle, the transmission service light was on. I contacted the dealership (as noted above) immediately. I was assured by the salesman that this 'happens all the time to Jeeps.'"

184. "While parking the vehicle, the ParkSense feature disabled on its own. Immediately thereafter, the red lightning bolt indicator light appeared on the dash, which has been known to be associated with the Electronic Throttle Control, glow plugs, swirl motor failure (low pressure in rail or fuel rail pressure malfunction) and also speed sensors. The vehicle then revved up on its own without acceleration while my foot was positioned firmly on the brake pedal. Immediately following that, the word "transmission" appeared on the dash, then the check engine light, then the collision indicator as if a car crash had occurred, which it had not. Finally, the power steering became very stiff. Drove the vehicle to the dealership it was purchased from and they said the codes were unknown like hieroglyphics. Left vehicle there. The following Monday the dealership informed me there were 3 software upgrades that were needed on the vehicle, however, those upgrades did not correct the problem. Technician also informed me the car was not safe to drive and they didn't feel safe driving it themselves and got off of the highway during a test run. The technician further explained the vehicle had 3 test runs and failed all 3 and it was beyond their expertise so Chrysler Engineers would be consulted this week. Lastly, the technician informed me I "may be ahead of a recall issue." The car is 5 and half months old. I ordered the car, meaning, I had it made/built from the manufacturer. It was not a car purchased from the lot. Therefore, no other drivers of the car and it is brand new. It is a safety concern, especially since the Cherokee has been out of production for many years until the 2014 release. As a side note, I remember an incident that occurred the week prior when the vehicle had difficulty shifting gears (automatic transmission). Instead it stalled and revved on its own.

CAS has also received a paper complaint alleging unintended acceleration, which may be found as an attachment to our [September 30 letter to Administrator Friedman](#).

We have also received a complaint via phone from Mr. Justin Davis of Indiana, who experienced a frightening and unexplained throttle surge event while driving his 2010 Dodge Ram. Mr. Davis was travelling at highway speed with his family when he tapped his cruise control off to change lanes and allow a vehicle to merge. When he attempted to resume cruise control speed, the vehicle responded as though someone "dropped it into 1st gear and floored it." Mr. Davis has also experience numerous stall/non-start problems. We would be happy to provide Mr. Davis' contact information to the agency should the agency desire to follow up on his complaint.

We are currently reviewing another online complaint that alleges unintended acceleration in a 2008 Jeep Grand Cherokee. We have yet to confirm the VIN for this complaint, which states the following: "When driving my 2008 Jeep with only 40,000 miles my car stalled out. The car completely turned off disabling breaking, steering and making my gears unable to move. The car continued to drive leaving me helpless in stoping this moving vehicle. I finally had to with a my strength punch the gear into park where my car then finally stopped moving. I was only going 20 MPH but imagine what could of occurred if I was on a highway, this letter which have a much different tone. I tried calling Jeep to explain what occurred not only because I felt their car failed and they should pay for my expenses on their failed part, but also to note it for a recall. I have researched and see that I am not the only one that has experienced this occurring with this Jeep. This is VERY dangerous and there should be immediate recalls so no one gets hurts as this is a very serious problem and I am lucky my outcome did not end in a worse way!"

Additionally, you will find attached to this letter an accident report from a May 2014 crash involving unintended acceleration in Vancouver, WA. The vehicle involved, a 2013 Dodge Challenger, is not a model included in the CAS petition, but does contain a TIPM that is the alleged source of the acceleration event. As former NHTSA Chief Counsel Frank Berndt pointed out in his [seminal defects litigation memo](#), evidence of the safety consequences of the failure of a component in one model can be applied to the failure of the same component in another model, even if the two models are made by different manufacturers. “Thus, evidence of a wiper failure on a Plymouth would be admissible to show the likely effect of wiper failure on a Capri.” Berndt Memo at p.9.

A cursory search of NHTSA VOQ’s reveals a number of similar complaints in the subject vehicles. The following VOQ’s cite unintended acceleration, surge, and/or cruise control issues: 10334720, 10340565, 10425148, 10428218, 10446078, 10466747, 10469534, 10479372, 10524054, 10542142, 10543492, 10552468, 10560621, 10594680, 10596862, 10606722, 10618677, 10621484, and 10633687. Again, NHTSA is in a better position to evaluate these complaints given the additional information available to the agency in its consumer complaint data. CAS also urges the agency to evaluate [EWR reports on the subject models](#) for acceleration-related claims.

Sincerely,

A handwritten signature in black ink, appearing to read 'm/b' followed by a stylized flourish.

Michael Brooks
Staff Attorney

Narrative

MENTIONED:
Vancouver public works,: Victim - CITY LIGHT POLE # V22143404
Tiatia, Jessica A: Involved or Mentioned - SHELL GAS STATION CLERK
Abel, Ryan A: Witness
Yoakum, Linda Ann: Operator of vehicle
Nash, Emery K: Victim
Sumner, Gregory L: Victim
Grebyonkin, Michael: Witness

NARRATIVE:
On 05/04/2014 at approximately 1640 hours, I was traveling EB on NE 49TH ST approaching NE 137TH AV preparing to turn SB on NE 137TH AV at the roundabout. As I began to negotiate the approach to the roundabout, I observed a purple Dodge Challenger at a high rate of speed SB in the roundabout. I did not observe the vehicle as it approached or

Vancouver Police Department

Case No.

14-6603

Narrative

entered the roundabout. The vehicle's speed was estimated between 80-90 MPH. The vehicle passed directly in front of my patrol car within approximately 20-30 feet. I had an monetary unobstructed view of the driver via the front windshield and the passenger side window as it passed. The operator's head position appeared to be downward with chin resting against the chest. It did not appear the operator of the vehicle made any attempts to slow or steer the vehicle to negotiate the roundabout. I observed the vehicle; strike the curb on the SW corner of the roundabout, drive up onto the sidewalk, strike a City of Vancouver Public Works aluminum light pole, crash through a fence located at 13611 NE 49TH ST, become airborne as it continued SB through the yard, crash through a tool shed located in the backyard of 13611 NE 49TH ST while airborne, before losing sight of it as it crashed through the back fence of 13611 NE 49TH ST.

I advised dispatch of the high speed collision requesting VFD respond CODE 3 to the area until the vehicle could be located and injuries be determined.

I located the vehicle in an adjacent property (4716 NE 137TH AV). The vehicle appeared to have impacted with a Toyota truck before coming to rest as it struck the front of the residence at 4716 NE 137TH and came to rest was partially in the front window of the residence.

I located a female seated in the driver seat of the purple Dodge Challenger bearing WA/AMZ7102. The female was initially non-responsive, however began gasping for air and swatting at the deployed airbag with her arms. The female uttered, "FIRE, FIRE." I informed the female she had been in a collision noting the vehicle was not on fire. The female advised she was currently in pain noting her back hurt. The female advised she did not have any significant pre-existing medical issues nor was she under the influence of an medications or alcohol. The female appeared confused as to how she had been involved in a collision.

I stood by with the female until VFD E6 arrived and took over assisting with medical needs.

Ryan A. Abel arrived at the location advising he was a witness to a collision involving the Dodge Challenger and a different vehicle. Abel advised the Challenger had struck a vehicle on NE 137TH AV between NE 49TH ST and NE 59TH ST. Abel advised he was a witness to that collision noting another motorist had stopped to check on the status of the occupants of the other vehicle while he followed the Dodge Challenger to the second collision location. Abel provided his phone number to be contacted at a later time in order to provide a more complete statement.

I advised Dispatch regarding the information provided by Abel. Officer Krebs responded to assist with the investigation locating the other collision location in the 5500 block of NE 137TH AV. Refer to Officer Krieb's Supplemental Report for details.

The VFD Heavy Rescue Unit responded to 4716 NE 137TH AV to assist with the extraction of the female driver. The female was successfully removed from the vehicle. VFD Medic Sam Harrison advised the female was to be transported to the hospital for further evaluation. VPD Medic Sam Harrison advised he did not detect any signs of impairment during his contact with the female driver.

Officer Landas, Officer Taylor, and Sergeant Blaisdell responded to the location to assist with the investigation.

Officer Landas provided located and provided me with the female driver's WA DL identifying her as **Linda A. Yoakum**.

Officer Landas took digital photographs while at the scene. Refer to Officer Landas's Supplemental Report for details.

Yoakum was transported via AMR M16-18 to SWWMC.

Officer Landas responded to SWWMC to obtain a medical update on Yoakum's condition and attempt contact with Yoakum. Refer to Officer Landas's Supplemental Report for details.

Case No.
14-6603

Narrative

Officer Landas obtained a sample of Yoakum's blood from medical staff while at SWWMC. Refer to Officer Landas's Supplemental Report for details.

Action Tow responded to remove the purple Dodge Challenger from the window and tow it from the location.

Officer Taylor took digital photographs while at the scene and assisted with the towing of the vehicle. Refer to Officer Taylor's Supplemental Report for details.

During the investigation, I contacted the property owner at 13611 NE 49TH ST (**Emery K. Nash**). Nash advised he recently purchased the property. Nash advised the fence surrounding his property was associated with his residence. Nash advised he did not have an estimate at this time regarding the value of the damages to his fence and tool shed as a result of the collision.

During the investigation, I contacted the property owner at 4716 NE 137TH AV (**Gregory L. Sumner**). Sumner advised the Toyota truck (bearing WA/B03942V) the challenger had collided with belonged to him. Sumner advised his truck was parked in the middle of the driveway and had been moved and flipped as result of the collision. Sumner advised he did not have an estimate at this time regarding the value of the damages to his residence and vehicle.

Dispatch advised Vancouver Public Works regarding the damage to the light pole (V22143404).

Following the on-scene investigation, I re-contacted Abel via phone. Abel advised he was traveling SB on NE 137TH AV from NE Fourth Plain BL behind traffic. Abel advised he noticed a purple Dodge Challenger attempting to pull out of the Shell Gas Station adjacent to the intersection. Abel advised he observed the purple Dodge Challenger approaching from behind swerving erratically in it's lane as if it was going to attempt to pass the line of traffic he was in. Abel advised he observed the vehicle pull along side the vehicle directly behind him before returning to the SB lane of travel to avoid an oncoming vehicle. Abel advised he then observed the vehicle directly behind him spin off the roadway colliding with a fence. Abel advised he was able to pull his vehicle off to the side of the road avoiding a collision with the Dodge Challenger as it sped past him and all other traffic. Abel advised he followed the vehicle to the second collision location where I was already in contact with the vehicle and the associated driver.

I responded to the Shell Gas Station where I contacted one of the clerk's identified as **Jessica A. Tiatia** where she related the following. Tiatia advised the driver of the described purple Dodge Challenger is a known customer noting she stops by from time-to-time. Tiatia advised the female had been in the gas station earlier and purchased corn-dogs and cigarettes. Tiatia advised the female was not observed impaired.

RECOMMENDED ACTION:

Insufficient information was been obtained at this time to complete Traffic Collision Report No. 3715153. Traffic Collision Report No. 3715153 will be submitted as an Attached Document in a Supplemental Report.

Suspend investigation pending WSP Laboratory toxicology results

I certify (or declare) under penalty of perjury under the laws of the state of Washington that the foregoing is true and correct. I intend my printed name and PSN on this document to be my signature. This document was signed in Clark County, Washington on 05/04/2014.

DETAILS

On 5/04/14 at approximately 1640 hours, I responded to assist Officer Ghezzi who had just witnessed a high speed vehicle collision in the area of NE 137th Ave/NE 49th St, Vancouver, WA 98682. While driving to the call I received information from dispatch that there had been another related collision on NE 137th Ave north of NE 49th St.

I responded to the second collision scene and located a silver 2012 Hyundai Sonata bearing WA/AOD4062, which had left the road and collided with a fence near the 5500 block of NE 137th Ave. On scene, I made contact with the driver of the Hyundai, Brandon Decker, and his wife, Tabetha Decker, and their 5 year old daughter, Alexia Decker, who were

Narrative

passengers in the vehicle.

Also on scene were two witnesses, Kimberly Russell and Jeanne Collins, and the owner of the damaged fence, Randi Christopherson.

I made contact with Brandon first and obtained his statement.

Statement of Brandon:

Brandon stated that he was driving southbound on NE 137th Ave just south of NE Fourth Plain Blvd when a purple Dodge sedan drove up very close behind him. The Dodge swerved back and forth behind his vehicle and then drove up next to him on the driver's side. Brandon stated that he believed the Dodge was going to attempt to pass him but there was oncoming traffic. The Dodge nearly collided head on with another vehicle in the northbound lane before swerving back behind Brandon's car. Then, the Dodge rammed the rear of Brandon's car causing him to lose control. Brandon stated that his vehicle began fish tailing and he was unable to regain control. Brandon crossed over the northbound lane, left the roadway and collided with a fence. Brandon stated that after the wreck, he observed the Dodge continue south on NE 137th Ave at a high rate of speed. Brandon stated that he could not describe the driver of the Dodge or recall the license plate.

End of Statement

Next I spoke to the two witnesses and the owner of the fence.

Statement of Collins:

Collins stated that she was sitting in her vehicle at the intersection of NE 59th St/NE 137th Ave facing east when she observed several vehicles approaching from the north. Collins stated that she saw a silver car (Brandon's vehicle) being followed closely by a purple sedan and then saw Brandon's vehicle start fish tailing. She stated that the purple sedan was driving "erratically" and swerving behind Brandon's car as they passed by her. Collins pulled out onto NE 137th Ave and followed the vehicles southbound. She then observed Brandon lose control of his vehicle and collide with a fence and observed the purple sedan speed off southbound.

End of statement

Statement of Russell:

Russell stated that she was driving northbound on NE 137th Ave near the 5300 block when she observed several cars approaching from the north. She noticed a purple sedan swerving out into the northbound lanes and watched as it nearly collided head on with a northbound vehicle that was ahead of her. Russell then saw that a silver car (Brandon's vehicle) was swerving in front of the purple car. Russell thought at first that the drivers were playing games but then realized that the silver car was losing control and watched as it left the road and collided with a fence. After the collision, Russell observed the purple car leave southbound at a high rate of speed. Russell stopped at the collision scene to check on Brandon and his family.

End of Statement

I met with Christopherson and she stated that she owns the damaged fence. The fence borders a field next to NE 137th Ave but actually belongs to the property at 13718 NE 54th Way, Vancouver, WA 98682. Christopherson estimated the damage to be approximately \$500. Christopherson did not witness the collision.

Photographs were taken of Brandon's vehicle and the damaged fence. While inspecting Brandon's vehicle, I observed

WSP DUI Form with Voluntary Consent to Draw Blood

SUPPLEMENTAL REPORT

On 05-04-2014, I responded to the traffic circle/roundabout at NE 137th Avenue and NE 49th Street to assist Ofc. M. Ghezzi with a traffic accident investigation in which a vehicle was observed traveling south on NE 137th Avenue and entered the roundabout area in excess of 90 MPH before striking the curb and colliding with a light pole, fences, vehicles, and a house before it came to a rest.

I was assigned to photograph the damage at 4716 NE 137th Avenue and 13611 NE 49th Street. Upon doing this, I made contact with the driver who had to be extracted from the vehicle by fire personnel with the jaws of life.

The female was identified as Linda YOAKUM. She was conscious and able to communicate but in a great amount of pain. A fire fighter located a purple purse in the purple Dodge Challenger YOAKUM was extracted from. I showed it to her and asked her if I could have permission to search for her wallet and license. She said, "Yes," and I located her license briefly handing it to Ofc. Ghezzi to copy down the information who then handed it back to me which I replaced in her wallet.

AMR transported YOAKUM to the Peace Health Southwest Medical Center ER where she was treated. YOAKUM was complaining of chest and back pain. I asked her if she would voluntarily consent to a blood draw to screen for alcohol and any drugs and she said, "Yes." I read her rights of refusal to her and told her she was not under obligation to comply. She reiterated that she would allow the blood draw.

While she was signing the paperwork, YOAKUM was telling me that she didn't know what happened. She said that she was at a friend's house earlier in Salmon Creek. The friend, Dr. Jud WITHERSPOON, was going to take a trip to Italy soon and she was supposed to housesit for him while he was gone. She left his house and stopped at the Shell station on Fourth Plain Blvd to get a couple of corn dogs and Pepsi's and a pack of cigarettes for her son before heading home to 4108 NE 145th Street. She said that was the last thing she remembered until she was being helped out of the car. YOAKUM said that she had not been drinking and only had cortisone for a knee that had been acting up.

YOAKUM told me I could find Dr. WITHERSPOON's contact information in her phone in her purse. I located the number and called him to notify him of the accident. He told me that YOAKUM was visiting and left the house around 1600 hours. He said that she had not been drinking when she was at his place.

I did not observe any signs of YOAKUM being under the influence of an alcoholic beverage. Her breath was normal. Her eyes were not bloodshot, but clear. She was lucid despite her pain and answered all of my questions clearly with no lag in her thought process.

ER Tech Roxana Roller drew the blood samples for me at 1832 hours. She used povidone-iodine to swab the area before the draw.

While interviewing YOAKUM. She was told that she had a compression fracture of the T-12 vertebra that would require surgery immediately.

Tow/Impound Sheet

NARRATIVE

On 05/04/2014, at approximately 1648 hrs, I was dispatched to NE 137th Ave and NE 49th Street to assist Officer Ghezzi with a multiple vehicle accident. The accident involved an elderly female driving a purple Dodge Challenger into a house. I arrived on scene and assisted by taking photos of the accident involving the crash of the purple Dodge Challenger into the house, located at 4716 NE 137TH Ave. The photos are downloaded to the image section of this report.

The driver/registered owner of the Dodge Challenger was transported to the hospital. The vehicle was not drivable and the owner was not available to have the vehicle removed from the scene due to her current condition. Action Tow was dispatched to the scene and they towed the vehicle away. I contacted CCSO Records and reported the towed vehicle to them.

RECOMMENDATIONS

Attached to Original report

I certify (or declare) under penalty of perjury under the laws of the state of Washington that the foregoing is true and correct. I intend my printed name and PSN on this document to be my signature. This document was signed in Clark County, Washington on 05/07/2014.
